

■ Match Score

98/100

■ Resume Summary

Rahul Sharma is an outstanding candidate for the **Python Developer Intern** position. Currently pursuing a B.Tech in Computer Science (Data Science), he possesses a robust technical foundation that perfectly aligns with the job requirements. He has practical, hands-on experience in **Python, Flask, SQL, and Machine Learning**, backed by relevant projects such as a Student Attendance Management System and a Sales Data Analysis tool. His resume also highlights crucial soft skills like **Communication, Teamwork, and Problem Solving**, making him an ideal cultural and technical fit.

■ Matching Skills

Python (Strong core programming foundation)

SQL (Relational database management)

Machine Learning (Theoretical knowledge and basic application)

Flask (Backend web framework experience)

Git (Version control system)

HTML, CSS & JavaScript (Frontend web technologies)

Communication, Teamwork, and Problem Solving (Key soft skills)

■ Missing Skills

None (The candidate meets 100% of the explicitly listed requirements in the job description).

■ Suggestions

Project Deployment: Deploy the Flask-based **Student Attendance Management System** on a cloud platform (like Render, Heroku, or AWS) and provide a live link in the resume.

Quantify Project Impact: Add measurable outcomes to the projects, such as "Optimized data query speeds by **20%** using optimized SQL queries."

Showcase ML Models: Expand on the **Machine Learning** section by specifying the algorithms used (e.g., Regression, Classification) in a dedicated project.
